

syrius S2000 PROLINE
TRUCKMATE Product Features

Snooper have taken the needs of truck drivers, coach drivers and anyone else who may travel in a vehicle larger than most. The NEW Snooper Syrius S2000 TRUCKMATE includes FREE TMC traffic updates ensuring that you reach your destination with the minimum of fuss!

Truckmate

This is a unique product from Snooper as the S2000 Truckmate contains dedicated routing designed to work WITH trucks and large vehicles such as coaches, buses and mobile homes PLUS award winning speed camera location information.

Simply tell TRUCKMATE the size and weight of your vehicle, plus the type of load and this amazing system will calculate a route which is safe and friendly with your vehicle. The S2000 Truckmate will take into account the width of roads on your route, with restrictions, low bridges and any other hazards which you may encounter.

Restrictions		Warnings	
<input type="checkbox"/> Height		<input type="checkbox"/> No right turn for trucks	<input type="checkbox"/> Steep road up ahead
<input type="checkbox"/> Weight		<input type="checkbox"/> No left turn for trucks	<input type="checkbox"/> Steep road down ahead
<input type="checkbox"/> Length		<input type="checkbox"/> Trucks with hazardous goods forbidden	<input type="checkbox"/> Tight bend ahead
<input type="checkbox"/> No trucks allowed		<input type="checkbox"/> No trucks with natural goods harmful to water	<input type="checkbox"/> Side winds
<input type="checkbox"/> No trailers			<input type="checkbox"/> Risk of grounding
<input type="checkbox"/> No 'U' Turns for trucks			

Multi-route technology

As well as being the most stylish and easy to use systems on today's roads, Snooper units pack a punch when it comes to performance as well. The "Multi-route" function on the Truckmate allows you to calculate a route around up to ten different destinations just by adding the postcodes. No need to reprogramme the system after each stop, simply fill in your day of destinations and Syrius will do the rest for you in just a few seconds!

TMC traffic updates FREE of charge

Knowing what problems lie ahead is of great importance - especially if you drive for a living so being one step ahead of the traffic jams comes in particularly handy! The Syrius S2000 Truckmate gives you that extra step

with its inbuilt TMS traffic information provided by ITIS - Probably the best traffic information provider in the UK.

Using hundreds of thousands of vehicles and sensors across the U, its reach and accuracy is far more accurate than those systems that use fixed sensors, making sure you never get caught out! Snooper Sirius Proline's TMC service will alert you to all traffic incidents across the country and lists them in order of current proximity to your journey. If there is congestion on your route, simply ask Proline to reroute you around it and enjoy hassle-free driving!

Bluetooth Hands-free Technology

Staying the right side of the law on the road is key when you drive for a living so the Sirius S2000 Proline benefits from the latest Bluetooth technology to allow you to make and receive phonecall from your current mobile through the Sirius and its touch screen. The built-in mic and speakers allow for hands free communication and there is also an additional extension microphone available for an additional £9.99 should you require it.

Award winning Speed Camera Technology

As with all of Snooper's navigation systems, the Sirius S2000 Truckmate benefits from their award winning Enigma speed camera database, which is constantly updated with new speed camera data. You will have access to this data 24 hours a day, 365 days a year to download information onto your system through any internet enabled PC ensuring that you are fully up-to date with where the speed trap hazards are located. The Sirius S2000 Truckmate provides advances warning of ALL known fixed speed traps including the traditional Gatso and average speed cameras on the motorway. In addition to fixed data, the Enigma database contains the locations of "Riskzones" i.e. areas well known for mobile laser speed trap activity.

**Access to the camera database requires a subscription fee to be paid. Either pay £99.95 for lifetime updates OR pay a monthly Direct Debit of £4.95 after an initial six months free.*

Advanced Street Level Mapping

Once again, as with all Snooper systems, the Sirius S2000 TRUCKMATE uses the best street level mapping available. Whether you choose the UK & Ireland version or the European version from the drop-down menu above, the S2000 Truckmate will give you turn by turn, accurate voice prompts and 2D / 3D display. Full postcode search is supported on the S2000 Truckmate thanks to data provided by the Ordnance Survey making it the most comprehensive search of its kind.

UK & Ireland - £399.99 inc VAT & Delivery

The Sirius S2000 comes with UK & Ireland mapping as standard for £399.99 Inc VAT and delivery. There is an option to upgrade to Western Europe at a later date for a further £99.99.

Western Europe - £449.99 inc VAT & Delivery

The Snooper Sirius S2000 Truckmate Western Europe will be available from March 2008 which comes complete with street level mapping of Western Europe. Currently, Truckmate data is only available for UK & Ireland, Benelux and Germany - outside of these areas the routing will remain the same as for regular sized vehicles.

The Sat Nav Warehouse Opinion;

Yet another impressive first from Snooper! It is difficult to compare this system to anything else on the market because there really isn't anything out there currently other than perhaps Snooper's Commercial Vehicle Assist software which is available on their other systems. The S2000 is the best unit that Snooper have brought out so when you add the Truckmate software then if you do drive a large vehicle, there really is nothing better than this system. We're told that the Truckmate software will be available for the rest of Western Europe and you will be able to download that as and when it's available. All in all, a handy product that could get you out of a pickle in avoiding non-truck-friendly routes!

Product Specifications

- TruckMate Routing Software
- TMC traffic information technology
